Git, jQuery, Bootstrap,
Adobe XD, Node.js, p5.js,
Chart.js, React Router

Tools

Babel, Webpack, ESLint

Other Skills

C#/.NET, XNA, Java, Maven

About me

I'm a self-taught front end developer that has been coding small to medium sized projects for over five years.

Professional Experience

Leverage Windows | 2021

- Commissioned to remake the site and transition from WordPress to a static solution
- Built using semantic HTML5, Sass and Javascript with Bootstrap
- Development version at: <https://mrsperry.github.io/leverage-windows>

Volunteer Experience

Overcast Network | 2015-2016

- Part of a selected volunteer team, each of which received a private testing server
- Responsible for adding and maintaining hundreds of custom map files created by the community
- Tested XML files against physical map properties to ensure they maps ran correctly

Personal Projects

Websites

- I've designed and created numerous small mockup websites to further my skills, all available at <https://mrsperry.github.io/portfolio>
- Used multiple technologies including Sass, Chart.js, jQuery and Bootstrap

Games

- **Overseer:** An idle/incremental virus scanning experience, available here: <https://mrsperry.github.io/overseer>
- **Asteroids:** A remake of the classic Atari game in vanilla javascript, available here: <https://mrsperry.github.io/asteroids>

Visual Projects

- I've created numerous projects that create art pieces, simulate physics and particle systems; available at <https://mrsperry.github.io/visuals>
